CETUNER

Web page: <http://www.penreader.com/PocketPC/CETuner.html>

Shopping Area:

http://www.penreader.com/PocketPC/CETuner/articles/Shopping_area_for_CETuner.html

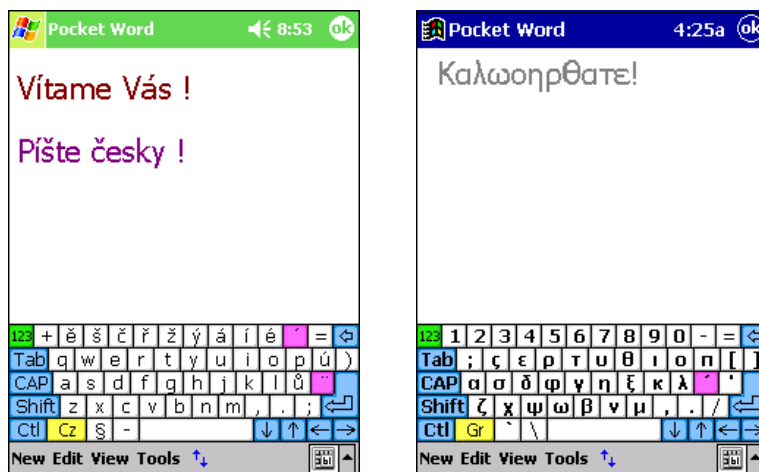

The CETuner utility is designed to adjust the user's interface options in the Windows CE 3.0/Pocket PC/Pocket PC 2002 operating system. It allows to change the fonts used in the interface's textual elements and colors used in the interface's graphical elements.

INTERKEY for Pocket PC

Web page: <http://www.penreader.com/PocketPC/InterKey.html>

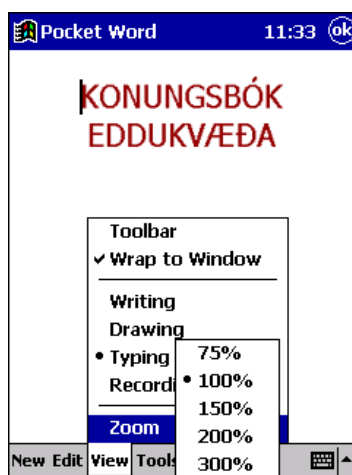

InterKey for pocket PC enlarges the capability of using onscreen keyboard. With InterKey you can use up to 56 onscreen national layouts for 30 national languages. Plus, extra functions (such as customizing keyboard look, quick switching between layouts, etc.) are available.

INTERKEY for Targus portable keyboards

Web page: <http://www.penreader.com/PocketPC/InterKey.html>

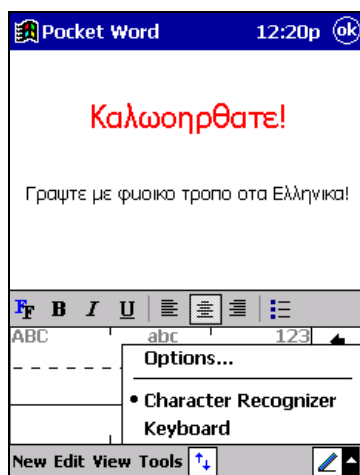

InterKey for Targus portable keyboards enlarges the capability of using portable keyboard. By default you can input information only in English. If you have InterKey installed on your PDA device you are able also to input information in 30 languages. Totally InterKey supports 56 national keyboard layouts.

INTERPEN

Web page: <http://www.penreader.com/PocketPC/InterPen.html>

InterPen is a national localization of Windows CE/Pocket PC Character recognizer. Now you have the possibility to enter national symbols (Cyrillic, Central European, Greek, etc.) with Character recognizer.

LANGUAGE EXTENDER (LEng)
