

# TWT Smart Plus – Getting Started

## Installing the service

- Transfer the SIS file by Infra-red, Bluetooth or use the Nokia Suite Installation wizard
- Go to the messages inbox folder and open the message.
- Go through TWT Smart installation procedure.  
(Answer yes when asked "Install only if you trust provider.")

## Answering a phone call (The ringing menu)

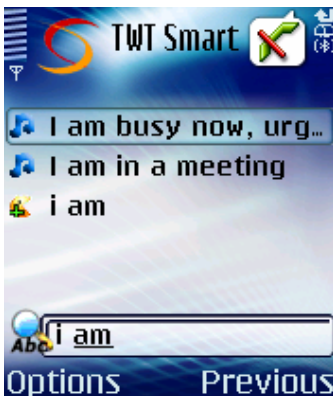

When getting an incoming call, The application will show at the foreground a menu to select 1 of 4 options:

- 1. Voice Call** – will answer the call in a regular conversation mode,
- 2. Silent Call** – enables to answer the call and conversing in silence.
- 3. Smart Reject** – enables to play response that promises your attention later
- 4. Text Chat (Go2Chat)** – switches from voice call to SMS chat like conversation.

**Please read below bellow a brief explanation on Silent Call, Smart Reject and Text Chat.**

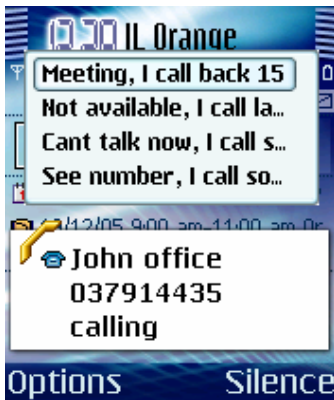

## Silent call

Using the joystick up/down left/right or typing a response you can play what ever you have to say. Listen to the distant party and continue selecting responses to be played.

**\* For your convenience, we recommend using a headset.**

## Smart Reject

Sometimes calls just can't be answered, however, the caller is too important for you to reject, or does not deserve such rudeness.

Smart Reject is designed for those situations exactly. With just one click the device can answer the call, play a response that promises your attention later, and terminate the call.

When you receive a call, a pop up menu appears with the "Smart Reject" option.

Choosing this option will bring up a list of ready to use responses with just one click.

After the response has been played, the call is terminated automatically.

You can change your smart reject folder any time

Go to Options->Edit Mode

Scroll left or right to the folder you'd like to be "Smart Reject"

Go to Options->Folders->Set as Smart Reject

Exit Edit Mode by choosing Options->Edit Mode off

## Text Chat (Go2Chat)

This feature allows you to switch the voice conversation to an active text chat. While choosing this option TWT will act as follows:

1. A voice message will be played to notify the caller that you would like to communicate using text messaging. You can change the played message in the settings menu under **Chat standby message**
2. The call will be terminated
3. A text message will be sent to the caller with the pre configured text ,you can change the text in the settings menu under **Chat initial text**
4. An Instant Messaging interface will appear and present the text chat history, allowing you to type text or search pre-typed messages to be sent as text messages to the caller.

## Content Download portal

You can customize responses even further by using the response content download portal. Enrich your conversations with recordings of politicians, comedians, famous movie quotes or any other noises and sounds.

Go to Options->Downloads, You'll be connected to the content download portal

Browse to listen, download, save and edit responses

Exit Edit Mode by choosing Options->Edit Mode off

## Supported Devices

- Nokia 7650, Nokia 3650/3600, Nokia N-Gage/N-Gage QD, Nokia 3660/3620, Siemens SX1, Nokia 7610, Nokia 6670, Nokia 6260, Panasonic x700/x701, Nokia N80, Nokia N92, Nokia N70, Nokia N71, Nokia E60, Nokia E61, Nokia E70, Nokia 3250, Nokia N90, Nokia N91, Nokia 6680, Nokia 6681, Nokia 6630, Nokia 6670, Nokia 3230, Nokia 3600, Nokia 3620, Nokia 3650, Nokia 3660, Nokia 6260, Nokia 6600, Nokia 7610,
